

Geberit Concealed Tank and Bowl Carrier System

Specification Sheet
110.816.00.1

Construction and material quality you can trust.

Elimination of the visible tank creates attractive European decorator options for today's efficient bathroom designs.

The Geberit concealed water closet tank and carrier ship as a single, fully factory-assembled unit, ready for fast, easy installation at the job site. Operation is more quiet than any conventional water closet tank. And, installation with your wall-mounted toilet unit results in easy cleaning under the off-the-floor bowl.

Materials include:

- Square structural 16 gauge galvanized steel frame.
- Impact resistant high density polyethylene tank.
- Insulated to eliminate condensation.
- Anti-siphon fill valve meets ANSI/ASSE 1002-99 standard.
- Attractive flush plate available in white to match your china or metallic finishes.

The Geberit concealed water closet tank and carrier are adjustable for bowl rim heights of 15" to 19" to be used with an IAPMO listed 1.6 GPF wall hung bowl. Requires 1/2" water supply and 3" nominal outlet.

In compliance with:

- IAPMO PS 58-92
- CSA B125-93

Carrier Approvals:

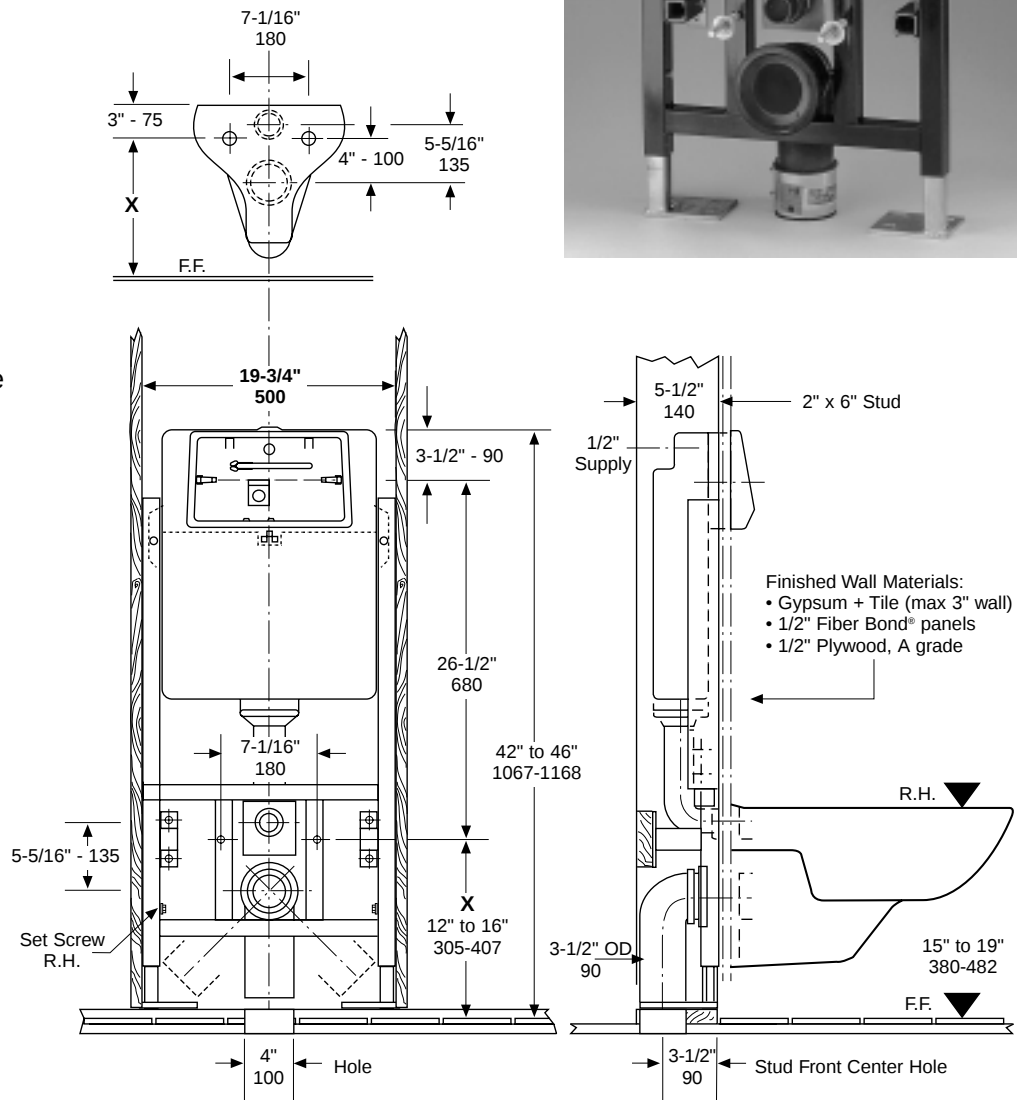

Concealed Tank and Carrier
Model No. 110.816
1.6 GPF
